## SKILLS

| | |
|---|---|
| **Languages:** | C++, Python, Java, C, HTML, CSS, JavaScript |
| **Frameworks:** | Scikit-learn, PyTorch, TensorFlow, Matplotlib, Flask, Streamlit |
| **Tools & Platforms:** | LeetCode, GeeksforGeeks, HackerRank, Kaggle, GitHub |
| **Soft Skills**: | Solution-oriented, Continuous Learning, Growth Mindset, Adaptability, Leadership |

## PROJECTS

**E-Commerce AI Support Agent—Full-Stack Developer + ML Engineer | GitHub** Present

- Orchestrated a multi-node agentic workflow using LangGraph and Streamlit to automate order tracking, product inquiries, and returns processing.
- Architected a multi-node pipeline with intent detection and secure SQL generation for real-time, safe database interactions.
- Optimized response latency using Groq LPU to deliver conversational data retrieval and automated session logging.

Tech: Python, LangChain, LangGraph, Groq LPU, Streamlit, SQL

**Automation Model Training—Full-Stack Developer + ML Engineer | GitHub** Feb'25

- Built a multimodal AutoML platform using a Streamlit-based full-stack application to automate the end-to-end machine learning lifecycle for tabular datasets.
- Engineered an automated preprocessing pipeline utilizing statistical imputation and SMOTE, integrated with 5-fold cross-validation to benchmark and recommend optimal models.
- Delivered a deployment-ready system featuring real-time data augmentation and automated serialization, reducing manual ML development effort by 75%.

Tech: Python, Streamlit, Scikit-learn, XGBoost, imbalanced-learn

**AI-Driven Educational Assessment System—Front-end Developer & AI Integration | GitHub** May' 24

- Crafted a responsive full-stack assessment platform using React and Tailwind CSS with a dual-role architecture for student–teacher workflows.
- Designed and integrated an automated question paper engine enabling educators to configure and publish assessments dynamically.
- Integrated Gemini API–based evaluation logic to analyze subjective responses, reducing manual grading effort by 90%.

Tech: React, Tailwind CSS, Gemini API, React Router, JavaScript, REST APIs

## TRAINING

**Full-Stack Development | CipherSchools (EdTech Company) | Certificate** Jun' 25 – Aug' 25

- Executed full-stack modules using React and Node.js, ensuring seamless frontend–backend synchronization.
- Constructed RESTful APIs with Express and managed backend databases including MySQL and MongoDB.
- Implemented authentication workflows and optimized UI responsiveness across devices.
- Strengthened understanding of application architecture, API integration, and performance optimization.

## CERTIFICATES

- Workshop at AWS Student Community Day Jalandhar|AWS | Certificate — Nov' 25
- Computational Theory: Language Principal & Finite Automata Theory|Infosys SpringBoard | Certificate — Aug' 25
- Problem Solving | HackerRank | Certificate — Aug' 25
- The Bits and Bytes of Computer Networking|COURSERA | Certificate — Sep' 24
- Responsive Web Design | freeCodeCamp | Certificate — Oct' 23

## ACHIEVEMENTS

- Solved **400+** coding problems across platforms including **250+** on LeetCode — Jan' 26
- Ranked in the top **7.6%** in an analytical skills assessment at Lovely Professional University — Aug' 25
- Maintained **100+** GitHub commits overall, reflecting consistent development — Feb' 26

## EDUCATION

**Lovely Professional University** Phagwara, Punjab
Bachelor of Technology Aug' 23 – Present
Computer Science and Engineering [AI&ML]; CGPA: 7.6

**Chitrakoot Public School & Research Center** Sikar, Rajasthan
Intermediate Apr' 21 – Mar' 22
Percentage: 73.2%

**Birla School Pilani** Jhunjhunu, Rajasthan
Matriculation Mar' 19 – May' 20
Percentage: 85.2%
